

## Diffused LED downlight

The next generation in LED Lighting. The 10W Diffused LED downlight kit is a modern flush design LED downlight suitable for use in new or retrofit installations. Designed as a true replacement for traditional 50W MR16 low voltage halogens or Compact Fluorescent Downlights. Acrylic diffuser for even light distribution and prevents unwanted glare.

### Features:

- High grade LED chipset with uniform colour consistency and high CRI
- Professionally designed aluminium heat sink for superior thermal control
- Up to 80 Lm/W LED efficiency
- Energy savings up to 80% when compared with traditional 50W MR16 halogen fixtures
- Does not emit harmful infrared or UV rays
- 90mm Cutout most retrofit applications
- Warm White (3000K) or Natural Daylight (5000K) LED Colour temperature
- Complete with LED dedicated constant current dimmable driver and flex / plug
- Comes in White or Satin Chrome Fixture colours
- CRI > 85
- IP44

### Application:

Energy saving lighting designed for residential, commercial, retail and retrofit.
